Subject: Recommendation for the Just Screw It team.

9 October, 2010

To whom it may concern,

I contracted Just Screw It to undertake some remedial works to a Paddington terrace.

The workmen were professional and attentive, sometimes going beyond the call of duty to achieve results that they could be proud of. They were courteous, not just to me, but importantly to the owner of the terrace on the opposite side of the wall. She is particularly difficult and vexatious, so showing her courtesy and winning her trust was a task that was very nearly impossible, yet they managed. This was in no small way because of the exceptional people skills of Myles. Skills matched only by his knowledge of his craft. A special mention also has to be made here for Andrew who also managed to win the neighbour's trust.

The works are over now. They were done swiftly and to a reasonable budget and most importantly the works were done properly and have been signed off by two independent engineering firms and two independent certifying authorities. There were complications and difficulties but such things are to be expected when working on a century old terrace.

I don't hesitate to recommend Myles, Andrew and the Just Screw It team.

Good luck with your construction works,

Yours,

Jan Golembiewski
